STR-9

Tough and dependable protection

STR-9 - 9MM
ITEM # M900SS006-CDN Black synthetic, nitride-hardened matte black

Three interchangeable backstraps offer a custom fit to get you on target quickly.

Every day tough meets every day carry

Stoeger brings an earned reputation for durable, dependable shotguns to the world of semiautomatic pistols with the new STR-9. This striker-fired 9mm comes packed with features you'd expect in a pistol costing twice as much. Its integrated rail, internal safety, reversible magazine release, optimized slide serrations, three-dot sight system and enhanced ergonomics deliver consistent performance and comfort.

P3500 – 12-GA, 3½"
ITEM # 31880 Black synthetic

A chrome-lined, ventilated rib barrel with a red-bar front sight and a screw-in modified choke comes standard on the P3500.

The new P3500 pump-action shotgun packs all the great features its stable mate the P3000 offers; a chrome-lined barrel, dual-action bars and a rotating bolt head, to name a few, and is chambered to deftly handle up to 3½" magnum loads. Its ergonomic styling with sleek, thin fore-end profile makes for a pleasingly smooth swing and instinctive pointing. The rock-solid P3500 pump gun also comes in at a price that will make even the most budget-conscious hunter smile.

The Stoeger P3500 is fitted with a checkered, synthetic stock which includes an integrated swivel stud for easy sling attachment and a recoil-absorbing, rubber buttpad. An inset Stoeger logo grip cap sets off the pistol grip.

A precision-machined, anodized aluminum receiver and an easily accessible cross-bolt safety speak to the practical, well-designed, quality craftsmanship found in the P3500.

The dual action bars of the P3500 provide smooth, solid, reliable operation of the pump-action. The twin parallel steel bars evenly distribute the force used to manipulate the manual action, preventing twisting and binding from occurring during ejection of a discharged shotshell and the loading of a new round into the chamber.

The rotating bolt head ensures a positive steel-to-steel lock up that provides the Stoeger pump with strength and reliability.

M3K 3-Gun Model

The need for speed

M3K

The M3K 3-Gun shotgun comes race-ready and gets you up and competing right out of the box. With an oversized bolt release and safety, extended bolt handle, and beveled loading port, the M3K is ultra-reliable and super fast on the reload. This is a 3-Gun shotgun that can deliver the goods without breaking the bank.

Inertia Driven® System

INERTIA DRIVEN® SYSTEM

The Inertia Driven® system used in the Model 3000, Model 3500 and Model 3020 is superior to any other operating system. The rotating bolt head ensures a positive steel-to-steel lock-up that provides the Stoeger semi-autos with ultimate strength and reliability.

As the empty shell exits the receiver, the energy of the moving bolt assembly re-cocks the hammer and compresses the recoil spring on the magazine tube. The recoil spring then thrusts the bolt assembly forward lifting the on-coming shell into position and chambering a fresh cartridge. The gun is ready to fire again...in a fraction of a second!

Near the end of the recoil cycle, chamber pressure drops to a safe level and the gun's rearward motion slows. The heavy inertia spring then thrusts the bolt assembly rearward, unlocking the rotating bolt head, extracting the spent shell from the chamber and pulling it against the ejector.

Your Stoeger firearm is backed by a 5-Year Warranty.

A 5-Year Warranty guarantees that if anything should go wrong, under normal use, your firearm will be serviced for you by skilled gunsmiths at our national firearm service center. While your Stoeger is under warranty, we will assume the cost of parts, labor and shipping required to get your firearm back to you and working perfectly.

The Deluxe Uplander is the ultimate refinement of the Uplander, with a single gold trigger, interchangeable choke tubes and a checkered AA-grade American walnut stock. It offers an exciting combination of features and low price.

UPLANDER YOUTH — .410, 3"
ITEM # 31135 A-Grade satin walnut

The Uplander Youth model is an excellent choice for young shooters and smaller stature adults. The short stock allows the opportunity for more hunters and shooters to enjoy the history and style of the classic side-by-side design.

Depending on the model, Uplanders come with either a single trigger or sturdy traditional double triggers for optimum reliability.

All of Stoeger's Uplander side-by-side models come standard with extractors.

Uplanders feature a tang-mounted safety, which is automatically engaged when the gun is broken open.

The receiver is precision machined to exacting tolerances to ensure that the Uplander will hold up year-after-year.

S6000-A

Fixed Barrel with Underlever Cocking

S6000-A UNDERLEVER AIRGUN COMBO
 .177 CAL, 1200 FPS
 (Includes 3-9 x 40mm scope)

As any airgun diehard will tell you, underlevers offer a number of substantial advantages over break-barrels. These advantages are perfectly embodied by the Stoeger S6000-A airgun. Firstly, this design offers perfect rigidity between the barrel and the receiver, which positively affects accuracy. Then, there is considerably less wear to the airgun's most important part—where the barrel meets the receiver and at the hinge-pin. Also, the extra weight of the cocking lever is ideally placed under the barrel, making the rifle steadier in your hands when you shoot. Try the S6000-A yourself—it will make you a fan.

The single-shot flip-up magazine is easily accessible and a snap to load. It is located just behind the fully-adjustable target rear sight.

The S6000-A has a fixed barrel, which means that every shot is mechanically consistent with the next one. The underlever is long, requiring less effort to operate it. When not in use, the underlever locks positively under the barrel and adds balance to the rifle.

INTEGRAL ACCESSORIES RAIL

The Stoeger XP4 air pistol is the culmination of our extensive firearms lineage. The XP4 has been designed for easy, ambidextrous handling. The ergonomic, composite frame is light and extremely attractive. The .177 caliber XP4 employs a recoilless, single-shot, pre-compressed propulsion technology for optimal shooting comfort and accuracy. A two-stage trigger with automatic safety is standard. High-visibility, precision fiber-optic sights with windage and elevation adjustable rearsight are included as well. The XP4 boasts an integral slide and accessories rail for laser devices or lights. X-SPORT pellets are recommended for maximum efficiency with the XP4.
