

BERETTA

500 YEARS. ONE PASSION.

“I have hunted in waterfowl in extreme conditions and location in Canada, from the Arctic to the prairies. My Beretta has truly been the shot gun that I have trusted and used on every trip without fail. It’s the ultimate waterfowl gun.”

- Kevin Beasley

The Beasley Brothers are born and raised Canadian boys who have always loved the great outdoors. They were raised hunting, fishing and playing hockey like most Canadian kids. Their extreme passion and love of family led them down a path into the hunting industry. They now work full time as hosts of Canada's most watched hunting TV series Canada in the Rough. The Documentary series features the greatness of Canada as the brothers explore the country's vast unspoiled wilderness from coasts to coast to coast filming their hunting adventures and sharing their love of family, conservation and the great nation they call home. Canada in the Rough is currently airing Nationally in Canada in both English and French, nationally in the USA and in 25 countries around the world.

 @BerettaCanada

HUNTING

HUNTING IS OUR PASSION. IT'S A TRADITION WE PASS DOWN THROUGH GENERATIONS, FROM FATHER TO SON, AND IT REMINDS US OF OUR MOST GENUINE VALUES. FOR THOSE WHO LOVE HUNTING AND THE OUTDOOR, BERETTA OFFERS A WIDE RANGE OF PRODUCTS SPECIFICALLY DESIGNED TO PROVIDE MAXIMUM COMFORT AND SAFETY, PERFORMANCE RIGHT AT THE TOP OF ITS CATEGORY AND ALL THE QUALITY THAT ONLY A BRAND WITH 500 YEARS OF EXPERIENCE CAN GUARANTEE.

Field Over and Under

Beautiful, accurate and reliable over the years: Beretta's range of over and under field guns, with their cross-bolt locking system that is now something of a signature, combine tradition with the highest technology.

All guns in the range feature Beretta's exceptional Steelium barrels: the gun last longer, diminishing recoil and muzzle rise whilst throwing excellent, consistent patterns.

687 EELL Classic

Exquisite game scenes hand finished by Beretta's master engravers.

687 EELL Diamond Pigeon Restyled

Intricate scroll engravings hand finished by Beretta's master engravers.

695 Field

Intricate scroll engravings hand finished by Beretta's master engravers.

693 Field

A jewel of a gun. Beautiful to look at, even better to shoot.

691 Field

The latest addition to the range. Elegant, accurate and built to last.

686 Silver Pigeon I

Outstanding value. The dream made possible.

**Description on page 13*

691 FIELD

The 690 FIELD I is the latest in Beretta's series of boxlock over and unders. Elegant, accurate and built to last. You can choose among a wide range of configurations. In addition to inheriting the technical functional and aesthetic features of its predecessor, like the Steelium Optimabore HP barrels, the Microcore pad, the solid-base top rib, the double-fenced top of the receiver and the selected european walnut wood with the enhanced BTS oil finishing process, the new 690 Field I introduces three interesting features:

Perfectly balanced.

The 690 Field I, despite its relatively light weight, feels extremely solid and pleasing to handle, thanks to the perfect balancing.

Outstanding reveiver.

The receiver features a double-fenced top, typical of the most refined over and unders, and a wider surface that improves balance, stability and durability of the gun.

Traditional extractors.

The 690 Field I feature a different automatic cartridge extraction system. The extractors derive from the premium segment over and unders for increased durability.

Slim forend.

Slim and rounded forend, for a better grip and a more streamlined profile.

Rich floral engraving.

The slim and elegant receiver of the 690 Field I is beautifully decorated with a refined scroll engraving made with the exclusive Beretta's laser technology. The rich floral theme in renaissance style was created by Beretta's master engravers and developed together with the company laser engraving engineers.

Solid-base top rib.

The 690 Field III top rib has a solid base, like the most refined shotguns. This solution provide a better structure and aesthetic.

691 Field
Available in 12g, 20g, 28g and .410

Microcore pad.

Superior softness, lightness and smoothness for the best recoil pad ever made by Beretta. Available in several height, Microcore allows to obtain the perfect trim before and after the shot.

Steelium barrels.

Exclusive tri-alloy steel, deep drilling, cold hammer-forging and vacuum distension are the "ingredients" of the world's best barrel, providing unrivaled safety and superior ballistics.

Optimabore HP.

Interchangeable-chokes barrels, designed for the best performance with both lead and HP steel shots.

693 FIELD

The traditional Beretta over and under has been combined with the highest technology to create this beautiful, accurate and elegant shotgun. Steelium barrels guarantee absolute precision while minimising weight, creating a jewel of a gun. Welcome to Beretta's perfect fusion of technology and tradition.

Selected wood.

Every stock is carefully crafted, oil finished and checked by the master Beretta stockmakers to meet the highest quality standards. The exclusive Beretta BTS oil finishing process enhance the natural look of the wood and make repairs much easier.

Outstanding reveiver.

The receiver features a double-fenced top, typical of the most refined over and unders, and a wider surface that improves balance, stability and durability of the gun.

Slim forend.

Slim and rounded forend, for a better grip and a more streamlined profile.

Solid-base top rib.

The 690 Field III top rib has a solid base, like the most refined shotguns. This solution provides better structure and aesthetic.

693 Field
Available in 12g and 20g

Microcore pad.

Superior softness, lightness and smoothness for the best recoil pad ever made by Beretta. Available in several heights, Microcore allows to obtain the perfect trim before and after the shot.

New engraving.

The engraving, for sure one of the world's best in its category, is rollmarked and crafted with care, enriching the receiver.

Steelium barrels.

Exclusive tri-alloy steel, deep drilling, cold hammer-forging and vacuum distension are the "ingredients" of the world's best barrel, providing unrivaled safety and superior ballistics.

Optimabore HP.

Interchangeable-chokes barrels, designed for the best performance with both lead and HP steel shots.

687 EELL

The 687 EELL is the absolute top of the line of Beretta's 680-series over-under shotguns. It features sideplates that act as extra canvas for the lavish hand-chased engraving, as well as a specially-selected walnut stock that gives it a true heirloom quality. But while it certainly figures well on display, the Diamond Pigeon's worth as a game gun is equally striking. With the point of balance right at the hinge-pin, it is a shotgun that comes up naturally to the shoulder while still having enough of a lively feeling forward of the supporting hand.

687 EELL Diamond Pigeon
Available in 12g, 20g, 28g and 20g/28g Combo

687 EELL Classic
Available in 12g, 20g, 28g and 20g/28g Combo

486 *by Marc Newson.*

486bymarcnewson.beretta.com

"To be asked to design for Beretta, one of the oldest companies in the world with its roots in the Italian Renaissance, was a great honour. The main focus for my design of the 486 was to simplify and rationalize all the surfaces. Specifically streamlining the area of the action. I believe that my vision to create an innovative and modern design while respecting the DNA of the product typology has been spectacularly achieved".

Wood-bridge.

The traditional tail of the receiver has been lowered allowing the wood to separate the receiver and the safety/selector like a wooden bridge over the steel.

New lever design.

This element has been specially conceived to emphasize its independence from the rest of the shotgun.

Edgeless receiver.

The receiver is edgeless and the lines flow through the entire surface of the shotgun with no sharp edges or breaks, elevating the concept of "round-body".

486 by Marc Newson
Available in 12g, 20g and 28g

486 *Parallelo*

Surprisingly light and easy-handling, the new 486 Parallelo Beretta unites the charm of the best gunsmithing tradition with the round body receiver design and with modern and innovative technologies. The result is a classic and elegant shotgun, with beautiful selected walnut, that has a traditional yet very contemporary design. A shotgun which is, on the same time, a reliable, safe and accurate firearm.

486 Parallelo
Available in 12g, 20g and 28g

Unique trigger mechanism.

The trigger mechanism is extremely reliable thanks to the "V" shaped hammer springs and to the rebounding hammers which guarantee crisp and fast trigger pulls. The trigger plate contains all the parts of the firing mechanism, assuring faster and easier disassembly for cleaning and inspection.

Triblock technology.

The barrels are matched thanks to the new Beretta Triblock system in order to deliver superior aesthetic and elegance which reflect the style of the classic demibloc shotguns. The care taken in producing the tapered external profile of the tubes enhances the instinctive aiming.

Environmentally friendly ejection / extraction selector.

The exclusive selector switch, located on the fore-end iron, provides for automatic ejection or manual extraction, which is an environmentally friendly way of keeping spent shells from littering fields.

Slim forend.

The fore-end features a push-button release mechanism located on the forend tip. The fore-end iron presents an adjusting device in order to maintain a constant tip forend iron fit. The result is an increase functionality and life of the parts.

690 VITTORIA SERIES

**First Beretta Range of shotguns dedicated to all ladies.
Developed with our champions for ladies.
Support the most growing sector in the shooting sports.**

690 Vittoria Field
Available in 12g and 20g

All the A400 semiautomatic shotguns feature Optimabore HP barrels with OCHP chokes. Pairs are available on request (price +20% versus the price of the two single shotguns) with 687 EELL Diamond Pigeon, 687 Classic, Giubileo, SO6 EELL and SO10. * on request. ** Price and timing to be defined for each single order based on finishing, wood grade and engraving. The SO6 EELL and SO10 EELL over and unders are made only with special orders. On request, these products can be customized up to the maximum level (feasibility to be checked with our master engravers and gunsmiths).

FIELD SEMI AUTO

THE 9 REASONS TO CHOOSE THE BERETTA SEMI AUTO TECHNOLOGY

1 THE BEST RECOIL REDUCTION.

Kick-Off, Kick-Off 3 and Kick-Off Mega ensure you up to 70% recoil reduction giving you more stability, comfort and control for faster target acquisition. More comfort for you, especially when you enjoy shooting hundreds of shots in a single day, and enhanced durability.

4 CLEANER THAN EVER AND EASIER TO CLEAN.

With B-Link, the only weak point of the gas-operating system has been practically reduced to zero. The re-engineering of gas ports and the systematic reduction of all the mechanical frictions the dirt is reduced to the minimum terms. You will experience the lowest maintenance need ever, and a smart, easy, fast and secure cleaning.

7 THE ONLY SHOTGUN THAT SPEAKS WITH YOUR SMARTPHONE.

Thanks to GunPod2 the highlights of your hunting sessions, along with photos and videos, finally collected in a handy digital archive, easy to use. You simply have to launch the app and put your smartphone in your pocket.

2 ALL-LOAD PROVEN RELIABILITY, FROM 24G. TO 64 GR.

Beretta gas-operating system B-Link is the world's most reliable system. The closing force is stronger because, when the reloading cycle begins, the energy available to unlock the bolt is significantly higher. Higher energy when opening allows higher closing force, preventing the bolt to unlock when it is not supposed to do it.

5 LOWEST MUZZLE JUMP.

The Beretta semiautomatic shotgun gives you the lowest muzzle jump ever combining the stunning recoil reduction of the Kick-Off devices to the unique ballistic features of the Steelium OptimaBore HP barrels. More control after each shot, better performance for each next one.

8 ERGONOMICS AND COMFORT IN EVERY COMPONENT.

Microcore pad: softer than gel, lighter than rubber and perfectly slipping, available in several dimensions to customize your length of pull. The B-Lok cap: an innovative magazine cap giving perfect and secure closing with just 60 degrees rotation instead of multiple turns.

3 UNBELIEVABLE RELOADING SPEED (+36%).

The Beretta gas-operated system is fast like an eye's blink. That's why it's called B-Link. The power of the gas-system, combined with the precision of the rotating bolt, ensure you a fast, reliable and smart cycling. You can spend all your magazine's cartridges before the 1st round touches the ground.

6 PERFECT PATTERNS ON EVERY SHOT.

The ingredients of the stunning accuracy of the Beretta Steelium barrels are: the exclusive tri-alloy Beretta Steel (Ni, Cr, Mo), the deep drilling, the cold hammering process and the vacuum distension. Every OptimaBore HP barrel profile has been specifically designed and tested to provide perfect accuracy with every type of shells: lead, steel and steel High Performance.

9 DESIGNED FOR THE FUTURE, NEVER FORGETTING TRADITION.

The Beretta in-house design team works every day to match design with functionality, giving you original and aesthetically beautiful, simple solutions that optimize the shape, weight and ease of use.

THERE ARE TWO THINGS YOU CAN ALWAYS RELY ON: THE SECOND ONE IS YOUR HUNTING DOG.

A400 Xtreme UNICO

A400 Xtreme Unico.

Black Synthetic or Camo, A400 Xtreme Unico provides maximum comfort, power and reliability. Perfect for all kind of hunting and with a special attitude for waterfowling, the A400 Xtreme Unico shoots all the 12 gauge cartridges with an outstanding 70% shock absorption, from 24 to 64 grams.

STEELIUM

WORLD'S BEST BARRELS.

Steelium is the production technology of the Beretta barrels, making the special tri-alloy steel become an outstanding ballistic jewel, thanks to a manufacturing process that is just as unique. Gun drilling, cold hammer forging special vacuum relieving give steel the ideal mechanical characteristic for superior ballistic performance.

OPTIMABORE HP

PERFECT BALLISTICS.

With a production begun in 1526, now accounting for more than 500.000 barrels a year, Beretta is a world leader in technological research applied to ballistics. The Optimabore HP technology, combined with Steelium, provides excellent accuracy and pattern quality with both lead and Steel HP shots.

B-LINK

36% FASTER AND CLEANER.

B-link is the engine of every A400 shotgun, providing exceptional reloading speed combined with power and cleanness at the top of the category. Being the fastest to fire the next shot means increasing the chance of hitting the target.

Micro Core

SOFTER & LIGHTER THAN RUBBER.

Microcore is an innovative recoil pad developed by Beretta thanks to its experience in decades of competitions around the world. Thanks to the open cell technopolymer - a softer, lighter and more slippery than rubber, the Microcore expands gradually and instantly, increasing its surface area on the shoulder and giving the shotgun secure and precise support.

GUN POD

YOUR DIGITAL HUNTING DIARY, INTUITIVE AND EASY TO USE.

Stop wondering how many rounds you shot last month or how many miles you walked with your dog: GunPod 2 will hold these statistics for you! The highlights of your hunting sessions, along with photos and videos, finally collected in a handy digital archive. And if you want to share on social networks? With GunPod 2 you can.

AQUA

100% PROTECTION FROM CORROSION.

In models equipped with AQUA technologies, all the internal parts are protected against rust and corrosion, while bolt, carrier and trigger are antireflective-treated. The barrel is internally chromed and externally coated to offer the best protection even in the worst conditions.

B-LOK

FAST LOCKING.

B-Lok allows secure and fast forend's cap closing in fractions of a second and with just a 60 degrees rotation. The design of the cap makes the handling easy even with gloves on.

KICK OFF

WORLD'S BEST RECOIL AND MUZZLE RAISE REDUCTION.

Kick-Off is the only recoil reduction system in the world using technologies similar to the automotive ones, to provide up to 70% shock absorption. In its PLUS and MEGA versions, the Kick-Off system provides even more benefits, specifically tailored on the needs of particular types of hunting.

DT11

DT11: THE NUMBER 1 CHOICE OF THE CHAMPIONS.

With DT11, balance, power and precision are in your hands, together with outstanding control and perfect trigger pull. The innovative Steelium PRO barrel ensures great pattern and reduced muzzle raise, while the wide receiver improves stability and ease of handling. The B-Fast adjusting devices provide the best ergonomics ever to assist you in hitting every time a target more.

DT11 Black Edition Sporting 12 ga.

DT11 Black. The highest expression of the Beretta competition over and under, now in a black and hyper-technological edition. Carbon fibre top rib, carbon fibre trigger plate and the most complete B-Fast ever, now featuring both stock and barrel balancing system. The choice of the champions, now in Black Edition.

EVERY BIG WIN IS MADE OF SMALL VICTORIES.

BERETTA COMPETITION SHOOTING GEAR. GET YOUR MARGINAL GAIN TO WIN.

Behind every smashed clay there is a wealth of details that have been studied and developed with the world's no.1 shooters. So, every detail of your shotgun, clothing, and accessories will really make a difference the next time you step onto the shooting field.

BLACK EDITION

Carbon fibre trigger plate DT11

Black Edition receiver DT11

Anti-glare barrel finish 692
690

Carbon fibre top rib DT11
692

Extremely lightweight and resistant, this new top rib provides perfect linearity even in the toughest shooting conditions, thanks to the new welding-free fixing technology.

Barrel balancing system DT11
692

The weight of the barrel is now adjustable through a set of weights that can be fixed to the side ribs, under the forend. The combined use of these weights with the stock balancing system allows an hyper-precise fit of the balance, compensating the natural variability of the wood density and improving the range of customization for the shooter.

Oversized bolt handle.

Oversized bolt-release lever.

1301 Competition 21" and 24"/12 ga.

1301 Tactical 18.5"/12 ga.

CARBINE

CX4 Storm

SEMI-AUTOMATIC CARBINE

Futuristic, Convertible, Versatile, Ergonomic, Precise, Reliable and Safe.

The carbine is designed to be quickly converted from one caliber into another through a simple and rapid substitution of barrel, magazine and magazine adapter. Some conversions into other calibers also require the substitution of the breech bolt.

The blowback type locking system and the bolt safety ensure reliability, great stability and precision in follow up shots. In addition to the push button manual safety, the automatic firing pin block prevents movement until the trigger is fully pulled. Should the carbine be dropped or struck against an object, the bolt safety will not allow the bolt to cycle and a further device blocks the hammer from disengaging. A chamber loaded indicator can be found on the ejector.

The 16.6" (422.5 mm), cold hammer forged (rifling included), Ni, Cr, Mo steel barrel is chrome lined for maximum corrosion resistance and increased barrel life. The front sight is fully adjustable for windage.

90 SERIES

92FS sets the standards in semiautomatic pistols since more than 30 years thanks to more than 4 millions pieces manufactured.

92 FS
A legend in the world of semiautomatic pistols and probably the most reliable and field-tested pistol of the history, 92 FS satisfied all the most demanding military requests and millions of customers around the globe.

92 A1 / 96 A1
The 92 A1 pistols by Beretta are derived from the legendary 92 FS.

92 FS Inox
The Beretta 92FS Inox gives you all the features of the legendary 92FS in a rugged and attractive satin stainless steel finish.

M9A3
From Vertec-style thin grip to universal slide design convertible from safety-decocker to decocker-only, the M9A3 was designed to deliver performance.

**THE STRIKER
EVERYONE WAS WAITING FOR.
HANDLE IT AND YOU 'LL UNDERSTAND
WHY IT'S BEEN WORTH THE WAIT.**

**TOP ERGONOMICS - TACTICAL FUNCTIONAL DESIGN - MAXIMUM
MODULARITY - SAFE STRIKER DEACTIVATION**

| Model | Product Number | Gauge | Length | Accessory |
|-------|----------------|-------|---------|--|
| APX | PW12111113311 | 9x19 | 4.25 in | 2x 10Rd MAG, Cable Lock, Backstraps, Cleaning Kit, |

Easy and quick disassembly thanks to the latch conveniently positioned on the side of the pistol.

Slide catch.
The slide catch is a lever that holds the slide open after the last round is fired. This allows the user to immediately determine that the pistol does not have a round in the chamber or in the magazine. The slide catch of the APX is internal, ambidextrous and completely snag free.

Automatic striker block safety
Beretta APX pistols have a striker blocking device that prevents forward movement of the striker unless the trigger is completely pulled.

Striker Deactivation Button
Beretta APX pistols have a unique feature that allows the user to deactivate the internal striker mechanism prior to disassembly. This means the pistol can be field stripped without pulling the trigger.

Newly designed slide.
The sides of the slide offer snag-proof insertion and extraction of the pistol from its holster. The front and rear serrations on the distinctive slide facilitate slide operation and safety control in wet conditions.

Fully flat trigger guard provides a support surface and accessory mounting interface under the barrel.

Trigger Safety
The trigger safety stops the trigger from traveling rearward through inertia in case the pistol is dropped. When the trigger is intentionally pulled, the trigger safety is instantly deactivated.

Trigger.
Ergonomic, flat-faced design that features straight rearward trigger press. 6 lb. trigger weight with clean break and 3mm tactile reset.

Large magazine release button for immediate magazine change. Reversible.

Ergonomic and modular backstrap.
Thanks to the new modular system, the pistol adapts to different hand sizes with interchangeable back-straps of different thickness and configurations for individualized performance.

Interchangeable grip frame housing and serialized chassis frame.
The internal chassis frame of this pistol is serialized. This allows grip frame housings to be exchanged or customized without affecting the serialized part.
