MADE BY HUNTERS
www.sakocanada.ca

@SakoCanada

“When your climbing the tallest mountains and hiking Canada’s most rugged terrain, you want to make your shot count when the big game animal your after presents a shot. Sako is so light and super accurate and dependable, I carry it everywhere.”

Keith Beasley

The Beasley Brothers are born and raised Canadian boys who have always loved the great outdoors. They were raised hunting, fishing and playing hockey like most Canadian kids. Their extreme passion and love of family led them down a path into the hunting industry. They now work full time as hosts of Canada’s most watched hunting TV series Canada in the Rough. The Documentary series features the greatness of Canada as the brothers explore the country’s vast unspoiled wilderness from coast to coast to coast filming their hunting adventures and sharing their love of family, conservation and the great nation they call home. Canada in the Rough is currently airing nationally in Canada in both English and French, in the USA and in 25 other countries around the world.

MADE BY HUNTERS

For us, it`s not just a profession - it`s a passion, a lifestyle we share with our customers.

There`s nothing more precious than sitting by the fire and sharing something special with your fellow hunters. It`s no secret that Sako`s global reputation is rooted in the unique skills and expertise of our employees, hunters who also share this way of life.

Combining a passion with work creates something truly new. The insights we get out there in the forest support what we develop next at the job, and the stories shared are built into our future products. We know the difference good quality can make.

Read our stories at sako.fi/manufacturing

We are Sako. We demand perfection.

CERTIFICATION OF PROOF TEST AND ACCURACY

We value our customers. To guarantee the best possible performance of all Sako rifles, we test each individual rifle for quality assurance. We do not guess or assume – we test. Each rifle is delivered with a certification that guarantees its quality and accuracy.

NEW

sako s20

THE RIFLE THAT IS YOU

ERGONOMIC HUNTING STOCK

The S20 hunting stock was designed with ultimate shooting comfort and ergonomics in mind. Having the best, most ergonomic grip on your rifle improves accuracy without compromising comfort. In an intense hunting situation, this can be the deciding factor between success and failure.

ADJUSTABLE CHEEK PIECE

ADJUSTABLE TRIGGER POSITION AND WEIGHT OF PULL

ADJUSTABLE LENGHT OF PULL

QUICK-DETACHABLE SLING PLACEMENT

The QD sling placement on both sides of the stock enable fast and easy attachment of the sling, improving rifle handling.

THUMBHOLE - STYLE PISTOL GRIP

The thumbhole-style design suits all hand sizes. It's made of high-quality soft, leather-like synthetic materials that provide the optimal grip in all situations.

S588207275 S20 HUNTER STOCK

S588207261 S20 HUNTER FOREND

The Sako S20 is the first true hybrid rifle, the one that both hunters and precision shooters can embrace. It's designed for passionate shooters who want to take and stay in control in every situation. The modular structure adapts to changing lifestyles, making S20 a truly future-proof bolt action rifle.

TACTICAL PRECISION STOCK

The S20 precision stock was created specifically for long distance and precision shooters. To ensure maximised control, accuracy and comfort, its features can be easily adjusted to your needs and complemented by multiple accessories via M-LOK placements.

ADJUSTABLE CHEEK PIECE

ADJUSTABLE TRIGGER POSITION AND WEIGHT OF PULL

ADJUSTABLE LENGHT OF PULL

M-LOK PLACEMENTS

The forend has integrated M-LOK placements on both sides (one on either side) and on the bottom (3+1).

THUMB REST

Enables the use of the non-trigger hand as support under the stock.

MUZZLE BRAKES

S588207091 S20 MUZZLE BRAKE SLIM BLUED 5/8 X 24

BARRICADE STOP

The barricade stop allows the shooter to support the rifle on barricades or obstacles without damaging the magazine and achieving a steadier position for maximum precision. It can be attached to any M-LOK compatible forend or hand guard.

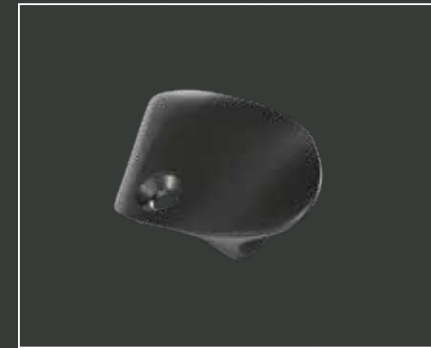

S588207328 S20 MLOK BARRICADE STOP

MONOPOD

The M-LOK compatible monopod provides further stability and support when you need that extra precision. You can quickly engage the desired height with one push of a button. The mount also has a threaded micro adjustment so that you can fine-tune your rifle's elevation by rotating the pod.

S588207331 S20 MLOK MONOPOD

THUMB REST

With the S20 thumb rest, you can easily improve your shooting position by placing your thumb on either the left or the right side of the precision stock. It enables a more secure and fixed hand position for more accurate index finger trigger control.

S588207101 S20 THUMB REST

10-ROUND MAGAZINE

If you want extended magazine capacity, 10 round (7 Magnum) magazines are available. Sako S20 magazines were designed to support reloaders with their longer maximum cartridge length and to safeguard the bullet from recoil damage.

sako 85

Custom is our standard

Sako 85 rifles are built with demanding design criteria, based on tradition and innovation, allowing you to choose between different models for the given hunting or training purpose. The Sako 85 series offers several stock styles and barrel options. These options, combined with a comprehensive caliber selection, will give you the ultimate bolt-action rifle. When you buy a Sako, you're buying a high-quality rifle that has undergone thorough quality assessments that ensure its lasting value from father to son.

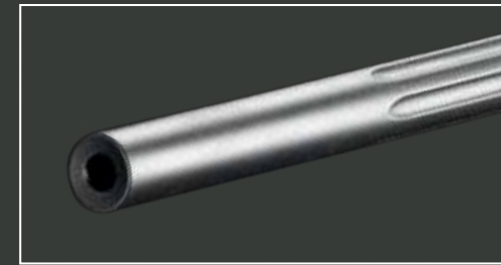

SIGHTS

Most of the Sako 85 models with a blued finish on the barrel are available with either standard or optional adjustable iron sights. The front bead is adjustable in elevation and the rear blade in windage.

EXTRACTOR & EJECTION

The Sako 85 has a famous extractor claw made of durable heat-treated steel. When the bolt forces the case back, the mechanical ejector fork ejects the case out of the rifle. The ejector is at the bottom of the rear bridge, not on the bolt face.

BARREL

Sako 85 barrels are manufactured with a passion for craftsmanship and the very best knowledge of Sako. Barrel blanks are drilled, honed, cold-hammer forged, finished and finally individually inspected by an optical fine-tuning instrument: the human eye. Twist rates are chosen for each caliber to optimize accuracy and bullet performance. Sako 85 barrels, blued or stainless, have a non-reflecting, satin-like surface – with the exception of the Sako 85 Deluxe and Safari models that have a highly polished finish.

MAGAZINE

The staggered, two-row magazine of the Sako 85 is made of stainless steel. The detachable magazine can also be loaded through the ejection port. The Total Control Latch (patent pending) of the Sako 85 prevents accidental magazine release.

TRIGGER

The weight of pull of the single-stage Sako 85 trigger unit is adjustable from 1 to 2 kg (2–4 lbs). An optional single-set trigger is available for most Sako 85 models. All Sako 85 rifles have an extremely durable, all-steel trigger guard that protects the trigger. An exception to this are the Finnlight and Carbonlight models, which have a lightweight hard-anodized aluminium trigger guard.

SAFETY

The special two-way Sako safety locks both the trigger and the bolt handle. The unique bolt release button of the Sako Safety System allows you to load or remove a cartridge from the chamber while the safety is engaged.

ACTION

Sako 85 actions come in six different sizes (CSA), providing reliable functioning for each caliber. All Sako 85 models feature controlled cartridge feed (RCS) to eliminate double feed or cartridge jams. The turn-bolt handle places the hand in a natural position during bolt operation, which allows for rapid repeated firing.

STOCK

The ergonomics of Sako 85's walnut and synthetic stocks are built for an optimal shooting posture. The excellent balance and smooth bolt operation of Sako 85 rifles enable fast, straight and accurate operation.

85 FINNLIGHT II

Experience an icon reborn - Enjoy ease of use and comfort for each shot with a lightweight fiberglass stock produced with cutting edge RTM technology. The Sako 85 Finnligh II has been treated with a weather resistant Cerakote® coating and is equipped with a fully adjustable cheek piece, making the rifle adaptable and ready for any challenge.

85 FINNLIGHT

The Sako 85 Finnlite rifle is for those who foray deep into the wild to reach their goal. Hunters on mountain trails or on long-distance treks prefer high-performance rifles that are full-sized, yet still lightweight. The fluted barrel of the Finnlite is just one of the many features that make it ideal for the hunter seeking a perfectly trimmed light rifle. The Sako 85 Finnlite is also an excellent choice for women and younger shooters.

MUZZLE BRAKE

Carbonlight in L action size calibers are delivered with separately packed muzzle brake.

85 CARBONLIGHT

The Sako 85 Carbonlight is a high-end rifle designed for gear-oriented enthusiasts who are after any type of game. This ultra-light multi-purpose hunting rifle features a carbon fiber stock with a soft-touch surface and a right-hand palm swell. With an approximate weight of only 2.4 kg, the Sako 85 Carbonlight with S-action or the new XS-action is exceptionally comfortable to carry, even on long treks. The models also come with a left-handed option and different action lengths, including M-action.

STOCK

Sako 85 Finnlite has a reinforced black polymer stock with a soft grey pattern on its grip surfaces and a Soft Touch surface treatment.

TECHNOLOGY

The Sako 85 Carbonlight rifle is built using the same CFRP technology that is used in both car and aerospace industries. This makes it extremely light, durable and rigid, resulting in a one-of-a-kind rifle.

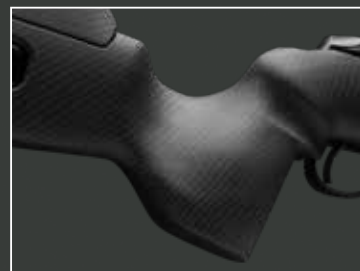

85 CARBON WOLF

The 85 Carbon Wolf is made for hunters who value the flexibility and adaptability of being able to effortlessly make ergonomic adjustments. It's built to allow you to hit hard and fast while trekking through the wild, or it can quickly be configured for the range. The RTM carbon fibre construction ensures lightness and durability.

85 HUNTER LEFT-HANDED

Left-handed shooters and hunters now have the option of choosing from the L action size calibers as well. The Sako 85 Hunter left-handed version offers the same wide spectrum of features as the right-handed model.

85 HUNTER

The Sako 85 Hunter comes with world-class Sako features, including the legendary Sako accuracy, smooth bolt operation and perfect balance, making it a valued rifle to both own and to shoot. Its design combines a walnut stock with either blued or stainless metal parts. Iron sights are available for the blued barrel option.

85 LAMINATED STAINLESS

The Sako 85 Laminated Stainless rifle has a high-grade stainless steel barrel, receiver and bolt. The grey matte-lacquered laminated hardwood stock provides a stable platform that withstands even the toughest conditions. The grey straight stock and stainless hardware of the Sako 85 Laminated Stainless makes it one of the world's most distinctive hunting rifles.

85 VARMINT STAINLESS

The Sako 85 Varmint Laminated Stainless rifle comes with all the same qualities as the Varmint model, only its stainless metal parts and stable laminate stock are optimized for rough conditions. The fluted barrel increases heat dissipation, decreases overall weight and gives this rifle its distinctive beauty.

85 BLACK BEAR

The Sako 85 Black Bear has a medium-contour fluted barrel, a matte black stock with soft gripping surfaces and blued action and barrel. Its light weight, compact size and good weather resistance mean it's a perfect choice for the active hunter. The Sako 85 Black Bear is extremely well balanced, making it ideal for situations that require rapid action.

85 KODIAK

The Sako 85 Kodiak was designed with the true hunter in mind. The straight, weatherproof stock is made of grey laminated hardwood and reinforced with two cross-bolts. The short, free-floating medium contour barrel features adjustable open sights and a band-type front swivel. The barrel is cold hammer-forged using high-grade alloy stainless steel. The bolt, receiver and detachable magazine are also made of stainless steel, and provide reliable functioning under severe weather conditions.

We have added an everyman's safari rifle into the Sako 85 product family: introducing the Brown Bear in action size XL. This extends the caliber selection of the Bear series to include 416 Rigby, 450 Rigby and 500 Jeffrey. The laminate stock has been redesigned to accommodate larger calibers, while the barrel profile has been redefined for the new calibers.

85 BAVARIAN

The Sako 85 Bavarian is a masterpiece, combining a high-grade walnut stock in a Central European tradition with the superior performance and technology of the Sako 85 series. Under its traditional exterior lie new modern features of the Sako 85 action.

BAVARIAN STOCK DESIGN

The oil-finished walnut stock also features a Schnabel-type fore-end and a pistol grip cap in rosewood. The classic checkering pattern of the Sako 85 Bavarian provides both functionality and traditional looks. Other characteristics of this classic model are the Bavarian cheek piece and comb.

FINNFIRE II

We take pride in our past, and the Sako Finnfire II celebrates the old Finnfire rifle. The Finnfire II brings a kind of retro spirit into our rimfire selection and features some of the classic design elements of the old Finnfire.

BOLT HANDLE

The Sako Finnfire II has a full metallic bolt handle in the spirit of the old Finnfire.

The Sako Quad is a special small-game bolt-action rimfire rifle with interchangeable barrels.

The barrel change only takes a few seconds: Just insert a tool, turn it three full circles, and tilt the barrel upwards while pulling out the action. Then simply insert another barrel, and possibly change caliber. This makes the Sako Quad extremely versatile – and its accuracy is phenomenal. Corresponding barrels have individual serial numbers. However, the Sako Quad is no ordinary rimfire: It is a small bore hunting and training firearm that functions as its own system, complete with several options to choose between.

QUAD RANGE

The Sako Quad Range is an extremely versatile rimfire rifle, ready to accompany you to a small game hunt or the range. An ergonomic stock combined with high adaptability makes for a unique, reliable rifle.

Hunters cannot choose the weather. Modern hunters choose their clothing according to the conditions they face, so why not choose a rifle accordingly as well? All Sako 85 Synthetic series rifles are unaffected by changes in external conditions thanks to their synthetic copolymer stocks.

85 LONG RANGE

If you are looking to shoot far, the Sako 85 Long Range rifle serves you well. This rifle has been designed for long-range hunting in particular. Specific details, such as a muzzle brake, 26" match grade barrel, double sling studs and a stock designed for the prone position, guarantee that you will hit your target even from extreme distances.

85 LONG RANGE

MUZZLE BRAKE

Flush design muzzle brake was added to reduce the recoil. Muzzle brake will make it easier to keep the target in sights after the shot.

STOCK

The Sako 85 Long Range has a flat fore-end that provides better support while shooting without a bipod. The double studs enable simultaneous attachment of both the sling and bipod.

sako TRG

The Sako TRG is an accuracy concept designed to accomplish a single-minded mission: to hit the target – whatever it takes. It is a result of Sako’s ambitious innovation laboratories, giving you unique performance that surpasses the highest demands for accuracy, reliability and versatility.

The TRG Accuracy concept is designed to meet individual demands. This means that it adapts to each shooter’s personal style, build and posture. The super target-grade barrel, made especially for the TRG rifles, is cold-hammer forged. The sturdy bolt with three locking lugs accurately feeds rounds from the centerline of a detachable staggered two-row magazine. All Sako TRG receivers are drilled and tapped for a Picatinny rail.

Compositions include black, forest green or desert tan coloured aluminum-reinforced stocks with various barrel and action finishes.

The TRG Accuracy Concept serves several military and law enforcement organizations as their primary sniper weapon system. The rifle is also used by long-range competition shooters and is a CISM competition winner.

TRG 22

The TRG 22 in .308 Win rifle can handle a multitude of accuracy tasks and is a thoroughbred 300 m ISSF standard competition rifle – and a CISM competition winner.

NEW

TRG 22/42 A1

The Sako TRG 22 and 42 A1 are made for one specific task: to hit the target – whatever it takes. The 22 and 42 A1 have been taken to the next level with new features inspired by our flagship model, the TRG M10.

FULLY ADJUSTABLE REAR STOCK

All adjustments can be done quickly without the use of any tools. The stock can also be securely locked down when required.

TRG 42

BLACK, GREEN & DESERT TAN

The Sako TRG 42 is a firearm for serious long-range competitions and can be equipped with a vast array of accessories to meet the most demanding requirements.

DOUBLE PLUNGERS

The TRG 42 2013 update introduced new double plungers. These make frequent cartridge ejection even more seamless.

FOLDING STOCK

The folding stock can be retrofitted to all TRG precision sniper rifles without any modifications to the weapon itself.

TRIGGER MECHANISM & BOLT HANDLE

The 2013 TRG update also introduced a new trigger mechanism for both the 22 and 42 models. This new mechanism ensures improved safety measures in case the rifle is accidentally dropped. It also features a new safety lever, which is ergonomically positioned and designed to make it faster and more convenient to use. The TRG 22/42 bolt handle attachment has been improved to withstand even the roughest handling.

TRG M10

COYOTE BROWN

The TRG M10 is a bolt action, multi-caliber, manually operated, magazine-fed shoulder-fired sniper weapon with a high-capacity magazine and fully adjustable stock that provides a single weapon system solution for many different applications. A high level of configurability make the TRG M10 an extremely versatile platform: it easily converts from a true long-range precision rifle to a more compact piece of equipment.

FULLY ADJUSTABLE REAR STOCK

All adjustments can be done quickly without the use of any tools. The stock can also be securely locked down when required by using tools that come inside the weapon. The pistol grip has an interchangeable back strap in three different sizes; all three are included in the standard package.

TACTILE INDICATORS

Identification of modular components for different calibers can be done visually or from tactile indicators placed on each critical component.

The Optilock™ scope mounts offer refined design that perfectly compliments Sako manufactured rifles. In order to offer even better usability, the Optilock™ scope mounts have received new features and improvements that will make this well regarded scope mounting system the choice for ultimate accuracy.

The standard Optilock™ base features an indexing edge that makes it easier to tighten the ring without any accidental rotation. All new Optilock™ bases have a brand new angular design to perfectly go along with the beauty of the rifle itself.

Optilock™ bases and adjustment rings are offered in multiple different lengths and sizes. This allows for a multitude of different scope sizes and brands to be fitted onto Sako & Tikka rifles.

The ring insert of the inner scope is made of polymer and protects the scope tube from deforming.

The new 34mm and 36mm ring sizes are always paired with the heavy duty (HD) bases. This is done to offer maximum durability while mounting even the heaviest of scopes and to guarantee that they have zero flex or movement.

NOTE: The HD rings are not suitable for use with the standard Optilock™ bases. The HD bases can be used with standard rings of any size.

OPTILOCK™ QUICK MOUNT

The new Optilock™ quick mount is the most versatile and easy way to mount optics to your rifle. Using the quick mount, a hunter or a shooter can easily dismount the scope from the rifle just by simply turning the levers on the base. Likewise, the scope can be quickly and safely installed back onto the rifle securely by turning the levers. All this can be done with a minimal shift to the impact point due to the high tolerance of the structure. By having two sets of quick mount rings it's even possible to change into a different scope in the middle of a hunting day if needed.

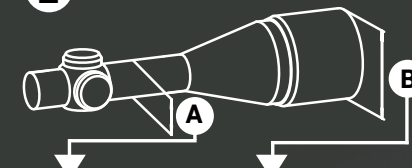

QUICK GUIDE for selection

1 Choose OPTILOCK BASE:

Rifle	Select the following Optilock Base:
Tikka, 17 mm rail	Optilock Base, Tikka*
Sako 85 (XS-SM), Sako 75 (I-III, SM), Sako L461/L579, S491/M591	Optilock Base, Sako Short*
Sako 85 (SM-L), Sako 75 (III-V)	Optilock Base, Sako Long*
Sako 85 (M-XL), Sako 75 (IV-V)	Optilock Base, Sako Extended
Sako Quad, Finnfire II, 11mm rail	Optilock Base, Sako Rimfire
Sako A7, Picatinny/Weaver	Optilock Base, Weaver Rail

2 Choose OPTILOCK RINGS:

A Tube diameter	B Objective outer diameter (mm)		Select the following Optilock Ring:
	w/ std barrel	w/ heavy barrel	
1"	<59	<51	→ 1" XTRA LO*
	<63	<55	→ 1" LO*
	<73	<65	→ 1" ME*
	<83	<75	→ 1" HI*
30 mm	<63	<55	→ 30mm XTRA LO*
	<67	<59	→ 30mm LO*
	<75	<67	→ 30mm ME*
	<83	<75	→ 30mm HI*
34 mm	<77	<69	→ 34mm LO*
	<87	<81	→ 34mm ME*
36 mm	<79	<71	→ 36mm LO*

***Also available as Quick-Release (QR) model. IMPORTANT!**
Quick-release base always requires specific Quick-Release Ring.
34mm and 36mm rings come with proprietary Optilock HD bases.
These rings are not compatible with standard bases.

With every Optilock™ package the user can find a selection table behind the box. This ensures it's easy to find the correct base & ring combination for your exact needs.

More info at www.sako.fi

sako CARTRIDGES

1 SAKO HAMMERHEAD Heavy, jacketed bonded core, soft point for larger calibers. Specially designed bullet form and construction prevents core separation and allows controlled mushrooming for excellent stopping power. The bullet is very effective for elk type big game hunting at short and medium ranges.

2 SAKO SUPER HAMMERHEAD Heavy jacketed, strong and non-fragmenting, ensuring controlled expansion. Bonded core construction produces high weight retention, producing good penetration. Boat-tailed for high-ballistic efficiency means flatter trajectory. First developed and tested in Sako ballistic laboratories, followed by actual extensive big game hunting tests.

3 GAMEHEAD Traditional and accurate soft point bullet. Excellent all-purpose hunting bullet on small/medium sized game.

4 DEERHEAD Deerhead is a bonded all-around bullet that can withstand extreme deformation without separation of the jacket from the lead core. Bullet expand rapidly and seldom loses more than 10% of its original weight.

5 TWINHEAD II With its unique cross-member jacket design and the bonded front core, the Swift A-Frame™ Bullet has become famous for its ability to combine three critical performance features – controlled expansion, deep penetration and 95% weight retention at all velocities.

6 SPEEDHEAD Full metal jacket bullet that delivers ultimate accuracy for target shooting and small game hunting. Ensures minimal pelt and meat damage on furred game or in bird hunting.

7 RACEHEAD OTM A thin jacketed, match grade open tip boat tailed bullet developed solely for rifle competition. When You need long-range accuracy, demand this load.

KNOW YOUR GAME

At Sako, we take great pride in our work. Each rifle is carefully assembled by a single person, and each individual barrel is visually inspected. Each rifle then goes through manual accuracy testing to confirm that the rifle can perform under 1MOA accuracy.

RAPID EXPANSION SERIES

Maximized stopping power for small game. Non-bonded core and a lighter jacket. Mainly used for varmint and trophy hunting.

CONTROLLED EXPANSION SERIES

Optimized stopping power and good durability against bone. Bonded core and a thicker jacket. Mainly used for hunting medium and big game.

TARGET SERIES

Precision performance and optimal aerodynamics. Higher shooting velocity, less bullet drop and wind drift.

	9.3x66	Range	15.0 / 231	720	50

The best way to build your confidence in field accuracy is to practice. You can improve your shooting skills without spending too much money. Sako range cartridges provide you with training and competition cartridges in larger quantities at affordable prices. Sako range cartridges are available in ten popular calibers.

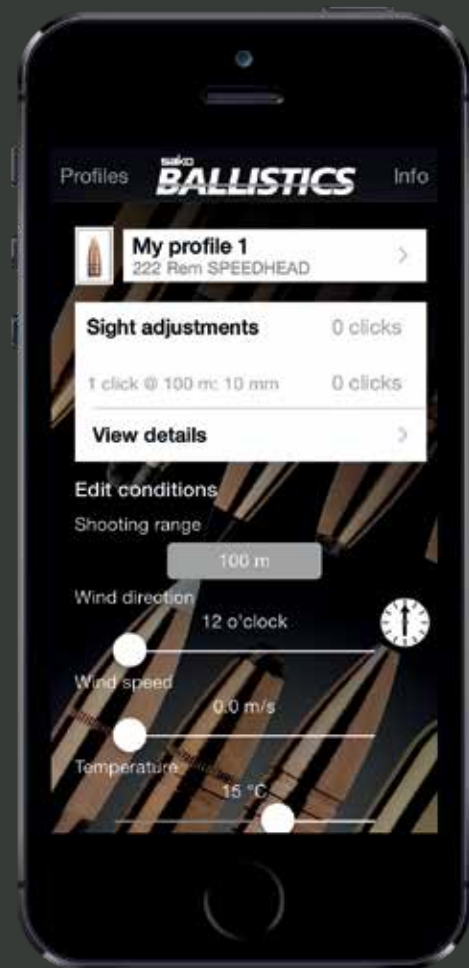

SAKO BALLISTICS

The Sako Mobile Ballistics App is an easy-to-use ballistic calculator allowing hunters and long-range shooters to identify the right cartridge for the given purpose.

The application stores data on all of Sako's cartridges, and you may create your own profile to Your rifle and ammunition combo. The software is free of charge and provides you with product pictures as well as specifications in order to help you find your match. Download it from the App Store or Google Play, and create your own profile. An internet-based desktop version can be found under bullet.sako.fi.

SOFTWARE FEATURES

-  *Different user profiles*
-  *Create custom cartridges*
-  *Metric and imperial units*
-  *Bullet review*
-  *Various scope clicks*
-  *Variable zeroing range*
-  *Temperature compensation*
-  *Air pressure compensation*
-  *Uphill and downhill compensation*
